REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance. The closest prior art to that of the instant invention is US6001447 to Tanahashi et al. While Tanahashi teaches the much of the structure of the claimed magnetic recording media, Tanahashi fails to teach the use of an oxidized "Cr-X" seedlayer beneath a non-oxidized Cr containing 1st underlayer. While the incorporation of oxygen into Cr based underlayer of Recording media is known, as shown by US5143794 to Suzuki et al., there is no teaching that would lead one of ordinary skill in the art to believe that incorporating oxygen into the seedlayer of Tanahashi would result in the applicant's claimed reduction in sigma/mean (grain size distribution).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
